

Users are advised to consult the Canadian Environmental Quality Guidelines introductory text, factsheet, and/or protocols for specific information and implementation guidance pertaining to each environmental quality guideline.

## 1,1,2-Trichloroethane

### Parameter 1: ORGANIC

### Parameter 2: Halogenated aliphatic compounds

### Parameter 3: Halogenated methanes

## Water Quality for the Protection of Aquatic Life

### Freshwater

|                      |         |
|----------------------|---------|
| Concentration (µg/L) | No data |
| Date                 | No data |

### Marine

|                      |         |
|----------------------|---------|
| Concentration (µg/L) | No data |
| Date                 | No data |

## Water Quality for the Protection of Agriculture

### Irrigation

|                      |         |
|----------------------|---------|
| Concentration (µg/L) | No data |
| Date                 | No data |

### Livestock

|                      |         |
|----------------------|---------|
| Concentration (µg/L) | No data |
| Date                 | No data |

## Sediment Quality for the Protection of Aquatic Life

### Freshwater

|                                         |         |
|-----------------------------------------|---------|
| Concentration (µg/kg dry weight) - ISQG | No data |
| Concentration (µg/kg dry weight) - PEL  | No data |
| Date                                    | No data |

### Marine

|                                         |         |
|-----------------------------------------|---------|
| Concentration (µg/kg dry weight) - ISQG | No data |
| Concentration (µg/kg dry weight) - PEL  | No data |

|                                                                                                                                                                                                                                                                     |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Date                                                                                                                                                                                                                                                                | No data |
| Soil Quality for the Protection of Environmental and Human Health                                                                                                                                                                                                   |         |
| Concentration (mg/kg dry weight) - Agricultural                                                                                                                                                                                                                     | 0.1     |
| Aliphatic chlorinated hydrocarbons include chloroform dichloroethane (1,1- 1,2-), dichloroethene (1,1- 1,2-) dichloromethane 1,2-dichloropropane, 1,2-dichloropropene (cis and trans) 1,1,2,2-tetrachlorethane carbon tetrachloride trichloroethane (1,1,1- 1,1,2-) |         |
| Concentration (mg/kg dry weight) - Residential / parkland                                                                                                                                                                                                           | 5       |
| Aliphatic chlorinated hydrocarbons include chloroform dichloroethane (1,1- 1,2-), dichloroethene (1,1- 1,2-) dichloromethane 1,2-dichloropropane, 1,2-dichloropropene (cis and trans) 1,1,2,2-tetrachlorethane carbon tetrachloride trichloroethane (1,1,1- 1,1,2-) |         |
| Concentration (mg/kg dry weight) - Commercial                                                                                                                                                                                                                       | 50      |
| Aliphatic chlorinated hydrocarbons include chloroform dichloroethane (1,1- 1,2-), dichloroethene (1,1- 1,2-) dichloromethane 1,2-dichloropropane, 1,2-dichloropropene (cis and trans) 1,1,2,2-tetrachlorethane carbon tetrachloride trichloroethane (1,1,1- 1,1,2-) |         |
| Concentration (mg/kg dry weight) - Industrial                                                                                                                                                                                                                       | 50      |
